

ABSTRACT OF THE DISCLOSURE

The present invention discloses a container package for an entire computer system. The entire computer system includes at least a computer monitor, a computer case, and a computer printer. The computer case includes a processor and the computer case can be either a horizontal or a tower type case.

- 5 Advantageously, the present invention provides a container package in which the computer case, monitor and computer printer can all be placed into a single box for shipment and display purposes. The present invention provides a low cost solution for both shipping and for point of display purchase. This environmentally friendly solution reduces the amount of waste that needs to be
- 10 disposed of after the computer system is unpacked. Further, the present invention makes it more likely that a potential customer will purchase a computer monitor, computer case and computer printer from the same manufacturer.
